

BUILDING PERMIT SUPPLEMENT

Important Lead-Safe Building Practices & Resources

If you're working on homes, schools or day care centers built pre-1978, you now must be EPA Lead-Safe Certified.

Avoid risk of government fines (up to \$37,500 for not being trained) and civil liability, plus gain competitive advantage as a lead-safe certified contractor.

Submit an application to certify your firm for five years. A one-day Renovation, Repair and Painting (RRP) class will also certify your renovators.

Landlords might be eligible for a voucher (lowers class cost from \$300 to \$25). FMI visit: healthyorkcounty.org

Lead is toxic to adults and especially to children living in a home. Improper removal of lead paint may also poison the person removing it and their family.

- Keep others, especially children and pregnant women, out of the work area.
- Keep all dust contained inside the work space. Create barriers between the work area and living space.
- Protect yourself and your workers from dust and debris.
- Clean up dust in lead-safe ways.

Maine DEP (general lead information)
Renovation Repair Painting Classes (RRP)
